Product & Developer Documentation: Real Estate Marketplace
Study features of already existing convent reality

1. Product Overview

This document outlines the features and workflow for a comprehensive real estate marketplace platform designed to connect various stakeholders in the property transaction ecosystem digitally.

Core Goal: To enable users to seamlessly search, list, promote, verify, and close property deals digitally.

Key Stakeholders:

- Property Owners
- Real Estate Agents
- Builders
- Buyers & Tenants

2. User Roles

The platform supports distinct user roles, each with specific permissions and responsibilities.

Role	Description
Buyer	Searches and contacts property owners/agents for purchase.
Tenant	Searches and contacts property owners/agents for rental properties.
Owner	Posts property listings directly for sale or rent.
Agent	Posts property listings on behalf of clients.
Builder	Posts project listings and new development details.
Admin	Platform moderation, content management, and system administration.
Sales Team(keep it internal in admin panel)	Manages subscription sales and upsell opportunities.

3. Main Modules

The system is built on a modular architecture to support diverse functionalities.

A. User App (Buyer/Tenant)
B. Agent Dashboard
C. Owner Dashboard
D. Builder Dashboard
E. Admin Panel
F. Sales CRM
G. Property Search Engine
H. Lead Management System
I. Subscription & Monetization Engine

4. Frontend Features (Web App)

Homepage Buttons & Components

The homepage serves as the primary entry point for property search and listing.

- 🔍 Search bar (Location + Buy/Rent/Commercial)
- Dropdown: Buy | Rent | PG | Plot | Commercial
- Budget filter
- Property Type filter
- Search Button
- Post Property (Call-to-Action)
- Login / Signup
- City Selector
- Download App
- Featured Projects Carousel
- Top Agents Section
- Trending Locations
- Verified Properties
- Banner Ads

Search Results Page

Users can refine property results using a comprehensive filters panel.

Filters Panel:

- Location
- Price range
- Property type
- BHK
- Area (sqft)
- Furnished status
- Possession status
- Owner/Agent/Builder
- Verified only
- With Photos/Videos
- Amenities
- New Projects
- RERA registered

Property Cards:

Each listing preview displays critical information and key actions.

Detail	Action	Badge/Indicator
Property image	Contact button	Verified badge
Price	Save button	Agent badge
Location	Compare button	Shortlist
Area		
BHK		

Property Detail Page

This dedicated page provides exhaustive information for a single property listing.

Key Sections & Features:

- Image Gallery
- Video
- Price
- EMI calculator
- Map location
- Nearby places
- Amenities
- Floor plan
- Contact owner/agent
- WhatsApp button
- Call button
- Chat button
- Book visit Calendar event
- Similar properties
- Project details
- Builder info
- RERA details
- Reviews

User Dashboard (Buyer/Tenant)

A personalized area for managing user activities and preferences.

- My profile

- My saved properties
- My searches
- My visits
- My chats
- My alerts
- My leads
- My bookings

5. Auth System

The platform utilizes a secure and multi-channel authentication system.

- Mobile OTP login
- Email login
- Google login
- Role selection (Buyer/Agent/Owner/Builder)
- KYC verification (for agents/builders)

6. Property Posting Workflow

This multi-step workflow guides users through creating a new listing.

Step	Details
Step 1: Choose Role	Owner, Agent, or Builder
Step 2: Property Details	Sell/Rent, Residential/Commercial, Property Type, BHK, Area, Price, Address, Locality, Landmark, Floor, Total floors, Facing, Furnishing, Age, Possession
Step 3: Upload	Photos, Videos, Floor plan, Documents (RERA, ownership)
Step 4: Amenities	Parking, Lift, Gym, Power backup, Security, Garden, Pool
Step 5: Contact Preferences	Call, WhatsApp, Chat
Step 6: Publish	Free listing or paid boost

7. Agent Dashboard (Most Important)

The Agent Dashboard is the central hub for professional users, focusing on listing management, lead nurturing, and performance tracking.

Agent Onboarding

The mandatory steps for an agent to gain full access to the dashboard.

- Mobile verification
- Email verification
- PAN verification
- Aadhaar verification
- RERA registration upload
- Office address Place
- Experience
- Operating locations

Agent Dashboard Features

Property Management

- Add property
- Edit property
- Delete property
- Mark sold/rented
- Boost property
- Featured listing
- Clone listing

Lead Management

- Buyer leads
- Tenant leads
- Call tracking
- WhatsApp leads
- Visit bookings Calendar event
- Lead status (New, Contacted, Visited, Closed)

CRM

- Follow-up reminders
- Notes
- Pipeline

- Commission tracking

Subscription Panel

- Buy credits
- Buy plans
- Renew plans
- Invoices
- Payment history

Performance

- Views
- Leads
- CTR
- Conversion
- Ranking score

8. Builder Dashboard

The Builder Dashboard is designed to manage projects, handle bulk listings, and track leads generated from new developments.

Key Features:

Project Management

- Add New Project (Multi-unit setup)
- Edit Project Details (Specifications, Phases, Amenities)
- Upload Project Documents (RERA, Approvals, Layouts)
- Bulk Unit Listing Management (Price, Availability, Status)

Lead Management
